

Senior Surveyor – Blowout Preventers **Job Description**

Summary

Survey blowout prevention equipment to ascertain condition of machinery and equipment, provide recommendations for lowering downtime, and determine repairs required for the equipment to meet minimum standards.

Essential Duties and Responsibilities. Other duties may be assigned.

- Assess blowout prevention equipment as outlined in the inspection checklist and/or workscope.
- Understand and apply assessment points included in the checklist.
- Observe all site specific safety rules as well as WEST safety rules.
- Troubleshoot all components and control systems.
- Identify potential sources of downtime, whether included in the checklist or not.
- Review and apply lessons learned from other rigs, including anomalies.
- Identify and document new lessons learned.
- Establish and maintain a good working relationship with client and drilling contractor personnel.
- Apply API and governing body rules, regulations, and recommendations.
- Compose and publish daily reports, submit to client and WEST home office.
- Provide recommendations based on assessment findings, supported by back-up documentation.
- Compose and submit final report in a timely manner.

Education and/or Experience

Ten years or more related experience and/or training; or equivalent combination of education and experience.

Computer Skills

To perform this job successfully, an individual should have knowledge of Microsoft Windows, MS-Word and MS-Excel.
